# Residential Management

Flexible solution for multifamily property managers

Solution Overview

MRI Software's Residential Management is the comprehensive, flexible solution for effectively managing the residential lifecycle. From online leasing and lead qualifications, to renewals and statements of deposit, MRI Residential Management provides an accurate view of the current state of your business, while remaining limitlessly adaptable to your unique business needs, no matter the properties in your portfolio.

Key Features

- Flat menu structure with browser & device freedom via MRI Version X

- Accurate, real-time data to effectively manage day-to-day accounting functions such as billing, reporting, project & facilities management

- Manage portfolio performance capturing income and expenses against projections

- Scalable user roles & security settings for risk mitigation

- Robust and configurable report library with full modification capabilities

Business Benefits

- Enable growth with scalable, automated processes, while freeing up resources for leasing and resident retention

- Greater visibility into financial reporting

- Efficiently navigate portfolio data with MRI GO

- Increase proficiency and accuracy with automated reporting and calculations, reducing manual work

- Easily facilitate the implementation of MRI product suite to meet your specific portfolio needs

"MRI Software has grown with the market and with the needs of management companies. They continue to be a key partner in our success."

Ron Herman, Goldberg Companies Inc.
