

Streamline account billing, increase accuracy and maximize revenue collection

Solution Overview

Need to maintain AR billings distinct from commercial or residential leases? With Corporate AR you are able to directly bill and receive for services, management fees, parking spaces, storage units, or other items outside of MRI's property management modules. Intuitive navigation and system automation will allow you to reduce manual data entry and streamline your accounts receivable process. Additionally, users can leverage the innovative MRI Flexibility Toolkit to easily modify views, pages, and reports to create a truly tailored user experience that is optimized for your business.

Key Features

- Easily post entries to the general ledger, run receivable reports, and review accounts
- Adjust or correct customer account balances with batch adjustments or reversals
- Review account history and balances through an inquiry view
- Leverage the comprehensive library of standard reports including batch listing, receivable ledger, aged delinquency, and account statement reports
- Users can modify views, pages, and reports to create a truly tailored user experience

Business Benefits

- Save time and money by simplifying and streamlining account billing
- Increase accounting accuracy and reduce manual data entry errors with system automation and built-in discrepancy notifications
- Enjoy greater visibility into financial performance with highly configurable reporting and analysis
- Recognize significant efficiency gains by integrating directly to the MRI accounting system
