

Drive your real estate operations forward with powerful, flexible accounting

Solution Overview

Your accounting is the heart of your business. You need a general ledger solution supporting both financial and non-financial data and built for the unique needs of the real estate industry.

Use MRI General Ledger as the system of record across your entire business, as well as create in-depth views of your portfolio's past, present, or future to help drive long-term planning. From streamlined workflows to automated reporting, General Ledger provides you a powerful solution to drive your real estate operations forward.

Features

- Automated complex calculations
- Budgeting and forecasting capabilities
- Detailed drill-down by fund, property type, development, geographical area and more
- Ownership tracking
- Multi-currency capabilities
- Easy import/export
- Role-based security

Business Benefits

- Gain insight into your portfolio's past, current and future financial status for strategic planning
- Streamline your operations with automated A/R and A/P workflows
- Easily manage multilevel consolidations, multi-property comparisons and complex multi-company accounting
- Automate financial and non-financial reporting for better, faster stakeholder insights
