Tracking after-hours staff on-site with OnLocation

Children's Medical Research Institute selects MRI OnLocation

About

1 in 20 children worldwide is born with a birth defect or genetic disease. Children's Medical Research Institute (CMRI) is dedicated to advancing the treatment and prevention of childhood diseases so every child has the opportunity for a healthy start to life.

Today, CMRI is the site of world-leading research in cancer, neurobiology, embryology, and gene therapy. CMRI is a founding member of the Westmead Research Hub, a major medical research precinct, uniting the efforts of local scientists to perform at a national and international level. The Institute employs more than a hundred full-time scientists and educates dozens of Ph.D. students (the ground-breaking scientists of the future) through its academic ties to the University of Sydney.

Business Challenge:

The paper-based visitor management and badging system at the Children's Medical Research Institute (CMRI) was creating too much paperwork. It was also taking too much of reception and facilities staff time to run, particularly when service providers were returning to the site. The CMRI also needed a safe and secure way for staff to sign in to the premises after hours. CMRI needed to:

- Find a way to easily track employees who were on-site after hours.
- Find a solution that didn't involve expensive add-on licenses and hardware.
- Replace their paper badge system for a high volume of visitors and contractors at the institutes' locations.
- Have dashboard visibility of who was on-site, when, and why.
- Be compliant with current Health and Safety regulations.
