

Emergency management made easy with OnLocation

Giesen Wines selects MRI OnLocation

About

Giesen Wines is a New Zealand winery that operates throughout the South Island. Giesen brothers Theo, Alex, and Marcel built Giesen Wines with a shared passion and family values. Every member of the Giesen Wines team works together on building up and maintaining the reputation of the Giesen name worldwide. They have around 100 employees based at their winery, vineyards, head office, and sales team.

Business Challenge:

Giesen Wines needed a capable cloud-based people and [evacuation management system](#) to replace their paper sign-in book and ensure everyone on their sites was safe and accounted for during emergency evacuation.

Giesen specifically needed a [visitor management solution](#) that would:

- be fast and easy to implement and manage
- let them manage the many visitors to their sites
- help their staff remember to sign-in on-site
- fix the problem of people forgetting to take the paper sign-in
- with them during an evacuation eventIt could be up and running quickly

- print stickers to give their visitors to easily identify them
- enable the Health and Safety team to make sure everyone on-site is properly inducted
- be accessible online and not take up space on their server

**Staff find it easy to sign in.
The pre-registering of visitors for winery tours is a great tool. It meets our Health and Safety compliance requirements.**

Andree Piddington

Health and Safety Compliance Manager

Solution:

Giesen chose to use MRI OnLocation as their visitor, employee, contractor, and evacuation management system after it was recommended to them by another winery. They replaced their old visitor book with OnLocation's quick, easy-to-use software system. Among other advantages, this meant that during an evacuation event, they could do a roll call from their mobile devices without worrying about remembering to take the paper sign-in book. Their evacuation headcount is now done quickly and effectively using the OnEvac app.

Using MRI OnLocation, Giesen Wines can now:

- Do a roll call from their mobile devices during an evacuation event and make sure everyone on-site is safe and accounted for using the OnEvac app.
- Use their MRI OnLocation kiosks (and tablets) to sign visitors, contractors, and staff into their sites.
- Let their Health and Safety Compliance Manager manage employees, visitors and contractors, through their MRI OnLocation Dashboard.
- Know exactly who is or was at each of their sites and why, in real-time, and make sure their legal health and safety responsibilities are being met using the MRI OnLocation Reporting.
- Send hazard notifications to people on-site using MRI OnLocation's Acknowledgement Notices.
- Ensure people on-site are inducted and manage induction records using MRI OnLocation's Induction Management.
- Get free 24-hour customer support from the MRI OnLocation Helpdesk.
