

MRI Cloud Assessments

Audit, Design & Migration services

Are you thinking about moving to the Cloud, but need to understand how ready your business is?

Recent UK public sector research reveals some of the challenges in migrating to the Cloud.

- 81% view Cloud as an enabler for broader transformation but aren't sure how to get there
- 83% have a lack of Cloud skills & resource
- 61% struggle to recruit the right people
- 79% have no defined Cloud policy/strategy

We will help you identify the options, risks & benefits of moving to the Cloud, so you can pinpoint the direction for your cloud journey.

What's included?

Our expert Cloud Consultants will complete a short engagement with key stakeholders in your organisation, focusing on the impact on Users, Applications, Data, and Infrastructure. A Cloud-Readiness Report will be prepared to identify the current system, network, and server topology and a Cloud-Migration Road map to guide you through your Digital Transformation.

Strategy Assessment

Our Consultants will evaluate your overall business drivers, goals, objectives, and the current state of your IT, outlining the organisational benefits of cloud migration.

Capability Assessment

A review of your in-house technology, tool-sets, and systems to determine application feasibility in the Cloud.

Application, Infrastructure & Network Assessment

Assessing your corporate infrastructure to provide an overview of your organisation's hardware, applications, and network infrastructure.

Key Outcomes & Options

- Develop a high level understanding of the current landscape including:
 - Data centre
 - IT Infrastructure
 - Operational Management capabilities
 - Data security requirements
- Understand key challenges & steps needed to transition to a flexible infrastructure & adoption of Cloud services
- A written management report inc: Summary of findings, recommendations & next steps
- Optional Strategic Consultancy services:
 - Working with you, we can recommend best-fit, secure cloud platform & migration strategy
 - TCO modelling to compare current and future IT spend.
 - Cloud strategy design assistance, prioritising workloads and applications for cloud migration
 - Detailed project & deployment plans for all Cloud migration features/applications/databases - can also include developing a post-production support process.
