mri prolease central

Manage equipment leases with a comprehensive platform

Solution Overview

When it comes to managing equipment leases while complying with international accounting standards, no solution is more intuitive, or robust, than MRI ProLease Central's Equipment Lease Administration software. As part of the MRI ProLease Central platform, the Equipment Lease Administration module gives accounting and finance professionals the power to manage all asset types such as vehicles, copiers, forklifts, field equipment, heavy machinery, and more.

Key Features

- Easily upload equipment lease data from Excel templates
- Handle single lease contracts or master contracts with asset level accounting and multiple asset tracking capabilities
- Create capitalization schedules at both lease or asset level
- Tax payment and expense management
- Easier calculation on Residual Value Guarantees
- Automated email alerts for critical dates and autorenewals
- An intuitive system which can be rapidly deployed to assist with tight deadlines
- Manage changes in asset's, write-offs, purchase options, extensions & terminations

Business Benefits

- Make complex calculations easier with powerful tools
- Never miss a critical lease term with constant visibility into your leases
- Establish and maintain an accurate equipment register
- Improve decision making and planning with access to detailed equipment data in one centralized database
- Reduce costs by identifying leased equipment no longer needed
