

Manage all your properties on one comprehensive lease administration system

Solutions Overview

MRI ProLease Central provides occupiers with a complete end-to-end solution for real estate lease administration. Manage your real estate leases and subleases, accommodate day-to-day changes, and track key dates, all on one platform. MRI ProLease Central delivers scalability to drive efficient management of a small number of leases to over 10,000 properties.

Key Features

-  Track all lease types including real estate, vehicles, office/IT equipment, machinery and more
-  Intuitive lease abstraction workflow enables the capture of key lease details and provides a link back to source documents
-  Automated critical date email alerts
-  Location mapping provides a visual representation of your property portfolio
-  Detailed customizable dashboards
-  Upload monthly sales information to track and distribute
-  Drives compliance calculations directly from your real estate information from a single platform
-  100% SaaS solution, ensures all new features and reports get instantly deployed

Business Benefits

- Intuitive user interface enables efficient and comprehensive data management
- Never miss critical lease date with automated email alerts
- Ensure a complete picture of property and equipment leases with a single source of information
- Integration with lease accounting tools deliver confident compliance standards
- Surface information easily with data visualization tools, dashboards and location mapping
- Deliver required transparency with reporting, audit trail capability, and access to historical lease information
